Complete Services with Lotus Domino and Websphere Portal

Lotus Notes a Websphere Portal offer today broad possibilities that enable us to use these two seemingly different platforms together and to interconnect these two platforms together.

Lotus Notes and Lotus Domino advantages:

- User friendly
- Quick application development
- Availability to work offline
- Stability
- Scalability
- High-quality rich client

Websphere Portal advantages:

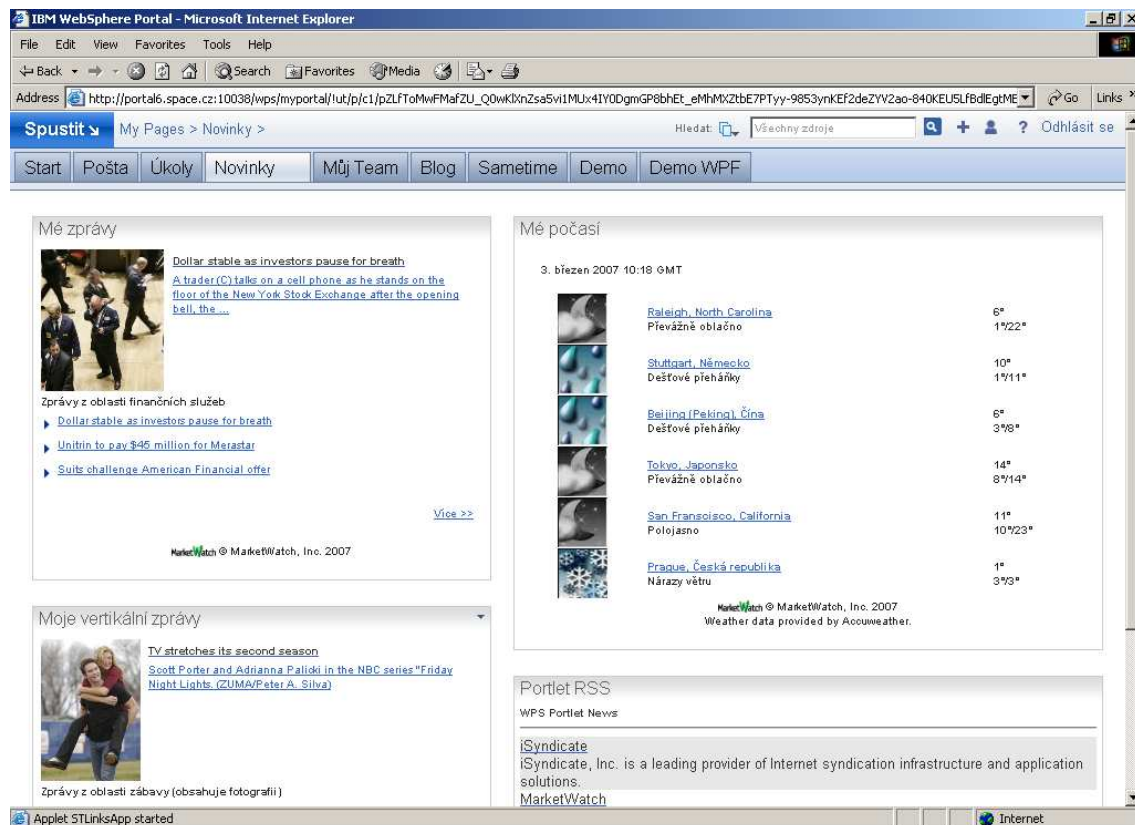

- Great intergration platform
- Support of standards such as JSR168
- Stability
- Scalability
- Web access

We use all these advantages to offer you the most effective solution just for your company. Notes CS is giving complete support for their Lotus and Portal clients. We offer implementation of whole infrastructure, integration between portal, Domino and another systems, giving technical advices, support, education and implementation of new functions or versions. Currently we have outsourcing agreements for support of Domino and Websphere portal platform. We use Lotus Domino like offline client for application work and Websphere Portal like strong integration framework.

We also provide slight migration from another environment to Domino or Websphere portal platform.

Examples of integration of WebSphere Portal with Lotus Domino:

- integration with Domino Directory (LDAP) for authorization
- front-end integration for Lotus Domino applications
